

SARA ALZHRANI

Data Analyst | Power BI • SQL • SOC Monitoring

+966 53 392 9002 • sara.alzhrani2004@gmail.com • linkedin.com/in/sara-alzhrani-10505727b • saraalzhrani7.github.io

PROFESSIONAL SUMMARY

Data Analyst specializing in Power BI, SQL, and Excel-based business intelligence, with a track record of building automated dashboards that cut manual reporting time by 30% while holding data accuracy at 99%. Brings a data-integrity-first mindset from cross-training in cybersecurity and SOC monitoring — a combination that strengthens how I validate, secure, and report on data. MIS graduate (Jeddah University, 2026), bilingual in Arabic and English.

TECHNICAL SKILLS

Business Intelligence: Power BI (Certified) — DAX, data modeling, interactive dashboards, KPI tracking

Data Management: SQL, data cleaning, validation & transformation, data quality assurance

Reporting Tools: Excel (Certified) — advanced formulas, pivot tables, automated reporting; PowerPoint — stakeholder reporting & visual storytelling

Security & Monitoring: Elastic SIEM, Wireshark, Oledump, incident documentation, threat detection

Core Competencies: Trend analysis, pattern identification, cross-department collaboration, ERP/BI systems, attention to detail

PROFESSIONAL EXPERIENCE

Data Analyst (Trainee)

September 2026

Virtual Experience, STC / Misk

- Analyzed user viewing behavior and streaming quality (HD/SD) for a TV streaming platform using Python and Pandas
- Built a time-series forecasting model (Holt-Winters) to predict viewership and identify peak usage times; developed a collaborative-filtering recommendation engine

SOC Analyst (Trainee)

August 2026

Virtual Experience, STC / Misk

- Investigated phishing emails and malicious macros with Oledump, and traced suspicious network traffic and C2 communications with Wireshark
- Detected unauthorized access attempts using Elastic SIEM and developed email security policies aligned with ISO/NIST standards

Data Analyst & Reporting Specialist

2022 – 2023

Freelance (Individuals & Students)

- Built Excel dashboards and automated reporting workflows for individual and student clients, cutting manual reporting time by 30% per project while maintaining 99% data accuracy
- Delivered actionable insights through periodic reports and PowerPoint presentations, independently managing multiple concurrent projects while meeting all deadlines

PROJECTS

Ransomware Incident Timeline (Power BI) github.com/saraalzhrani7/ransomware-incident-timeline-powerbi

- Built a 4-page Power BI report tracing a ransomware incident end-to-end — detection delay, root cause, response actions, and recovered value — using a synthetic dataset of 480 incidents
- Designed custom DAX text-output measures and a fully custom report theme; quantified impact with before/after KPIs (detection time cut from 14.2 to 5.4 days, SAR 1.93M value protected)
- Built cross-page navigation and an interactive root-cause matrix (department × severity × entry vector) to support executive drill-down

Security Operations Dashboard (Power BI × SOC) github.com/saraalzhrani7/security-operations-dashboard-powerbi

- Built a Power BI dashboard converting a simulated SIEM alert log (720 alerts) into executive KPIs — incident volume by severity, mean time to resolution (MTTR), and false positive rate — using custom DAX measures
- Analyzed target-system and department exposure through an interactive matrix, and mapped alert types to MITRE ATT&CK tactics for added threat-intelligence depth

Sales Performance Dashboard (Power BI) github.com/saraalzhrani7/-sales-dashboard-powerbi

- Designed a 7-table relational data model (sales, products, customers, employees, inventory, expenses, calendar) using a synthetic dataset of 30,000+ transactions
- Developed custom DAX measures for key KPIs — including dynamic Top Product calculation and Return Rate ratio — to track revenue, quantity sold, and customer counts
- Built a two-page interactive report (bar, line, pie, funnel charts + KPI cards) segmenting sales by region, branch, payment method, and quarter

SOC Analyst Portfolio github.com/saraalzhrani7/-soc-analyst-portfolio

- Documented four end-to-end incident response labs covering phishing/malware triage, network traffic analysis, security policy design, and SIEM log analysis
- Used Oledump and Wireshark to detect a malicious macro and trace a C2 connection; investigated proxy logs in Elastic/Kibana and produced professional incident reports

INTERNSHIP & VOLUNTEER EXPERIENCE

Data Entry & Medical Records Intern

June – August 2025

King Abdullah Medical Complex, Jeddah

- Managed structured data entry for health records in a regulated, high-confidentiality environment, applying strict accuracy and quality-control standards

Excel Reporting Volunteer Trainer

2023 – 2024

Independent

- Designed and delivered Excel reporting workshops, strengthening participants' data visualization and dashboard-building skills

EDUCATION

B.Sc. in Management Information Systems — Jeddah University, Saudi Arabia (June 2026)

CERTIFICATIONS & TRAINING

- Power BI, Excel & Data Processing — Exclusive Technology Training Center (2026)
- Data Analyst — STC / Misk (2026)
- SOC Analyst — STC / Misk (2026)
- Mathematical Formulas for Data Analysis — HADAF (2026)
- AI Fundamentals & Applications — SDAIA (2025)
- Financial Performance Management, Business Plan Research & Feasibility — Edraak (2023)

LANGUAGES

Arabic (Native) | English (Fluent)
