

SARA ALZAHHRANI

Data Analyst | Power BI · SQL · Python — Dashboards that Drive Decisions

sara.alzhrani2004@gmail.com | +966 53 392 9002 | linkedin.com/in/sara-alzahrani-10505727b | saraalzhrani7.github.io

PROFESSIONAL SUMMARY

Data Analyst specializing in Power BI, SQL, and Python, with a track record of building automated dashboards that cut manual reporting time by 30% while holding data accuracy at 99%. Experienced in building relational data models, writing DAX measures, and turning large datasets (30,000+ records) into executive-ready KPIs and reports. MIS graduate (Jeddah University, 2026), bilingual in Arabic and English.

TECHNICAL SKILLS

Business Intelligence: Power BI (Certified) — DAX, data modeling, interactive dashboards, KPI tracking

Data Management: SQL, MongoDB — data cleaning, validation & transformation, data quality assurance

Programming & Modeling: Python (Pandas) — exploratory analysis, time-series forecasting (Holt-Winters), recommendation systems

Automation & Web: Web scraping (Python), GitHub Actions (scheduled pipelines), JSON data pipelines

Reporting Tools: Excel (Certified) — advanced formulas, pivot tables; PowerPoint — stakeholder reporting

Core Competencies: Trend analysis, pattern identification, data storytelling, cross-department collaboration, attention to detail

PROFESSIONAL EXPERIENCE

Data Analyst (Trainee)

September 2026

Virtual Experience, STC / Misk

- Analyzed user viewing behavior and streaming quality (HD/SD) for a TV streaming platform using Python and Pandas
- Built a Holt-Winters forecasting model to predict viewership and a collaborative-filtering recommendation engine

Operational Risk Analyst (Trainee)

September 2026

Virtual Experience, SIDF / Misk

- Conducted structured data-driven risk analysis and assessment exercises, applying critical thinking to proposed mitigation approaches
- Produced analytical reports aligned with SIDF's operational risk framework

Data Analyst & Reporting Specialist

2022 - 2023

Freelance (Individuals & Students)

- Built Excel dashboards and automated reporting workflows, cutting manual reporting time by 30% while maintaining 99% data accuracy
- Delivered insights via periodic reports and PowerPoint presentations across multiple concurrent projects

SOC Analyst (Trainee)

August 2026

Virtual Experience, STC / Misk

- Investigated security logs and network traffic data using Elastic SIEM and Wireshark, strengthening data-validation and pattern-detection skills

PROJECTS

Awal Khatwa — Internship & Entry-Level Job Aggregation Platform (Python, GitHub Actions, JSON, PWA)

github.com/saraalzhrani7/awal-khatwa | saraalzhrani7.github.io/awal-khatwa

- Built and shipped a live Python web-scraping pipeline pulling daily from 39+ Saudi employer ATS systems (Workday, Oracle, SuccessFactors, Ashby, Workable, Pinpoint), with automatic filtering and classification across 12 fields
- Automated daily updates via GitHub Actions; built an installable PWA with save/apply tracking, deadline reminders, and an ATS resume-matching tool

Sales Performance Dashboard (Power BI, DAX)

github.com/saraalzhrani7/sales-dashboard-powerbi

- Built a 7-table relational data model on 30,000+ transactions with custom DAX measures (Top Product, Return Rate) across a 2-page interactive report segmented by region, branch, and quarter

Ransomware Incident Timeline (Power BI, DAX, Power Query)

github.com/saraalzhrani7/ransomware-incident-timeline-powerbi

- Built a 4-page Power BI report analyzing 480 records end-to-end; cut detection time from 14.2 to 5.4 days and quantified SAR 1.93M in protected value through custom DAX measures and an interactive root-cause matrix

Security Operations Dashboard (Power BI, DAX)

github.com/saraalzhrani7/security-operations-dashboard-powerbi

- Converted a 720-record alert log into executive KPIs — incident volume, mean time to resolution, false-positive rate — using custom DAX measures and an interactive matrix

INTERNSHIP & VOLUNTEER EXPERIENCE

Data Entry & Medical Records Intern

May - August 2025

King Abdullah Medical Complex, Jeddah

- Managed structured data entry for health records in a regulated, high-confidentiality environment
- Role later expanded to include handling call-center inquiries and resolving service tickets within defined response standards

EDUCATION

B.Sc. in Management Information Systems — Jeddah University, Saudi Arabia

September 2022 - June 2026

CERTIFICATIONS & TRAINING

- Data Analysis Using Power BI — Exclusive Technology Training Center, TVTC-accredited (2026)
- Excel Skills & Data Processing — Intishar Al-Ilm Training Institute, TVTC-accredited (2026)
- Database & SQL Track (Intro to Databases, SQL 101-103, MongoDB) — Satr Academy x Tuwaiq (2026)
- Mathematical Formulas for Data Analysis — HADAF (2026)
- AI Fundamentals & Applications — SDAIA (2025)

LANGUAGES

Arabic (Native) | English (Fluent)
